

## **Climate under control**

### **New test chambers WT3/WK3**

Weiss Umwelttechnik GmbH - specialists for both standard and special test systems for environmental simulation - presents the new, robust and durable test chambers WT3/WK3 that combine operational reliability and low maintenance with high performance, e.g. 85/85 tests (85 °C/85 % r. h.).

The new test chambers are equipped with a large 12" TFT touch screen monitor with intuitive operation as well as an illuminated CONTROLPAD\* that permanently displays the operational status. The new radio remote control for locking the door is both convenient and reliable. The interface allows access at all times to current applications as well as remote monitoring or service access via the network.

New features include integrated humidity bath flushing, spacious water tank, automated water replenishment and the self-cleaning humidity sensor for improving operational reliability. The optimised airstream ensures a fluctuation of max.  $\pm 1.5K$  in the test space with the autoadaptive control.
